JEAN CLAUDE ADJANOHOUN

FULL STACK DEVELOPER

I am deeply passionate about becoming a full stack developer and furthering my knowledge in Software Development Life Cycle. Through online courses offered through LinkedIn, MIT OpenCourseWare, SoloLearn, and Edx, I have had the opportunity to learn HTML, CSS, JavaScript, Jquery, and Json. I thoroughly enjoyed learning about Agile and Waterfall methodologies. I was challenged when first introduced to Object Oriented Programming but am gaining proficiency as I continue taking classes. I have also deepened my understanding of backend languages by learning Python and C# and their frameworks.
